Snowboarding On The iPhone - again

Tuesday, 16 June 2009

I've not tried this yet, but its getting a lot of press. TiltnTwist games releasec Snowboarding TNT in the Apple AppStore for Â£1.99, according to IGN.com.

Snowboarding TNT is a fast-moving sports challenge that requires players to tilt and twist their handsets to control the downhill action and avoid obstacles - no need to bother hassling with tiny buttons to control game action.

It looks kind of old Intellivision Skiing game converted to snowboarding. Maybe not the best way to go.
